

I am a long time shareholder of Global Crossing (GX) well before it filed for bankruptcy and have been following closely the outcome.

Last week, the long awaited reply from President Bush came out for FCC to look into this fiasco again. It is plain and clear to all investors that this GX bankruptcy is a fraudulent one and should not be approved by FCC. It would be a betrayal to Americans if it goes to Singapore Technologies Telemedia (STT).

We all know of the FRAUD. We know that NATIONAL SECURITY is an issue and we know that other Government Departments, to name a few, the Department of Defense (DOD) and Homeland Security object to this deal vigorously. I know a lot of people have already sent in their comments to your Office. The U.S. Government can never claim they did not see or receive our "Righteous" and "Patriotic" comments.

Since your office is now inundated with all the facts of the Frauds and the Liars of GX Management, I would not repeat these issues but would only add one for your consideration. It is known to us shareholders that Karl Schwarz of COMMAXXESS has come up with an offer higher than STT. We strongly support his proposal as his offer include us shareholders with 10% of the new company. That being the case, FCC should not overlook his bid for the interest of existing shareholders. FCC should reject STT and STOP the deal.

Thank you in advance for your kind attention.

P.S. - for your information, all my holdings on GX shares are in my 401K account.
